EI-Hub
EARLY INTERVENTION SOLUTION

Transition Update

Access the EI-Hub through the Health Commerce System (HCS)

The security of Early Intervention Program (EIP) data is a top priority of the Bureau of Early Intervention (BEI). When the EIP transitions to the EI-Hub solution, data will continue to be protected by the New York State (NYS) Health Commerce System (HCS) firewall. HCS is a secure system that ensures compliance with federal and State requirements for safeguarding protected information.

Similar to NYEIS, the EI-Hub solution will be an option on the HCS post-login landing page. Once a user selects the EI-Hub option from the HCS landing page, they will have access to all components of the EI-Hub solution (according to your role), including:

- ❖ Case Management
- ❖ Service Logging
- ❖ Billing and Claiming
- ❖ Learning Management System (LMS)
- ❖ Provider Enrollment

⚠️ *Following the implementation of the EI-Hub solution (May 2022), EIBilling.com, the EI Billing Knowledge Base, and the EI-Hub LMS will no longer be accessible without an HCS login.*

Updates

The EI-Hub project team will be launching a bi-weekly demonstration series beginning January 19, 2022. These demonstrations will walk through specific functionality in the EI-Hub and provide an opportunity for attendees to ask questions about the EI-Hub component or functionality being demonstrated.

These sessions will occur every other Wednesday from 12:00 pm to 1:00 pm. Recordings of the demonstrations will be posted to the EI-Hub Learning Management System (LMS). Be on the look out for a schedule of upcoming demonstration topics and webinar logistics including login.
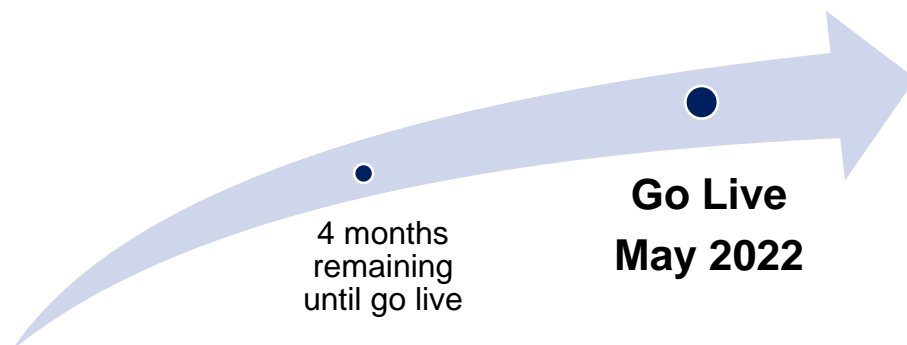

Action Required!

If you **currently have HCS account**, no action is required. You will continue to use the same username and password.

If you **do not currently have an HCS account** and will need access to the EI-Hub solution, you will need to register as a new user for an HCS account. New users will need to coordinate with their organization's HCS administrator to obtain access.
